## MESSAGE FROM THE PRESIDENT & CEO

UTAX has made its advancement in the Ladies' intimate apparel field today with its unique product development after experiencing & earning years of technical know-hows since the Company was found. We work by emphasizing on our home made production fleet under the policy of "Automated Smart Production System", pursuing for developing highly efficient automated machinery & system where to realizing a very UTAX's Product Identity possible.

Looking at the changes globally nowadays on market trend, supply-chain & etc., where the speed & ability to cope with these changes other than the ability on product development does matter. At time that it will not be sufficient enough to sustain in the market place only with the self-ability in technical & engineering development, Open-Innovation could be an essence.

To combine our Technical Efficiency with the Open-Innovation where to meet the changes quickly & flexibly shall therefore be our new challenge tomorrow.

Humanly & environmentally friendly on what we are producing, From the No.1 domestic Japan market share to one of the global top maker shall be our goal. We shall anticipate the tomorrow's technological break-thru of UTAX group.

PRESIDENT & CEO, **UTAKA DAISUKE**

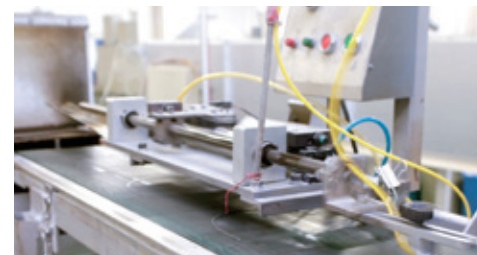

## Technology

Processing of various type of materials such as fabrics, metals, and resins.

We are capable of forming any metallic underwire to any kind of shape. Also, we are able to color match any difficult color of semi-finish product/ finished product.

Regarding to Nylon-coating, our nylon-coating carries a high performance for parts of intimate apparels, medical products and other coatable products.

Added that, we UTAX develops and self-made our own production machinery.

### Metal Work

The technology of producing the bra underwire. We are capable of forming any bra underwire of any designated shapes.

The high-tech computerized wire bending machine responding to the auto-wire bending program, once inputting the blue print of the specific wire shapes. The computerized wire bending machine is capable of handling an equiangular spiral shape to the complexed 3D dimension shapes. Our production line is 100% computerized which permits the monitoring of the bending performance.

### Nylon Coating

The technology that to coat any coatable object, including film. This coating technology allows to mass coat small objects.

We carry Black and White as the basic colors, moreover, we are doing the DTM services. Our nylon coating technology applies mainly on inner accessories (Underwire/Adjuster). No one feel uncomfortable while they are wearing, with the smooth surface by our coating technique.

### Dyeing

We work on the dying works of "Fabric, Resin, Bonding parts, semi-finished product, and finished product". Normally it is hard to maintain the quality of the products with the High-temperature dyeing, because there are issues of "color fastness" and "shape deformation". However, we are able to solve these problems by "homemade dyeing machine" & the "know-how of dyeing intimate accessories since 1989". Our specialized dyeing work would be able to cater the elegant & gorgeous colors with the combination of both machine and experience.

### Machine Development

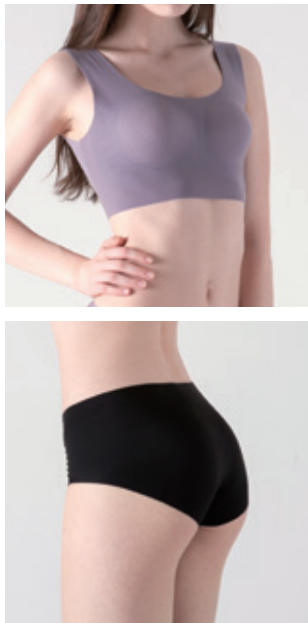

UTAX develops the production machine by our own. The machine design blue-prints and the built-up are made corresponding to the products requirements.

With that, the quality performance such as tensile strength, hardness, wear test and etc will be assessed.

# Products

With the no frayed & no curled Clean-cut fabric, we will be able to develop successful 100% seamless apparels.

We make NSP (Non Seam Product) for "The First One and the Only One". Our accessories collection allow us to maintain the top market share in the domestic raw material field.

## Inner wear

Use the “Free cut fabric” where the edge would not be curled after cut. The feature of free cut fabric is “no fray”, ”stretchable” and “close to skin”.

To make the best use of free cut fabric characters, we made an inner wear by using the unique liquid glue adhering instead of conventional sewing.

The unique liquid glue would not become hard/thick when it adheres to fabrics.

The free cut fabric inner wear will wrap a body up, and will not leave a mark.

## BRA accessories

UTAX has its own technology on "nylon coating", "dyeing", and "resin bonding". By applying those skills to our collection, we are capable of leading the market in the bra accessories and component field.

Hook & Eye

Under wire

Bias tape

Rings & Slides

Wire Casing

Tappey snapper

Motif

Fixel tape

Front Closure

Maternity Hook

Film bone

Crotch tape

Coil bone

Shoulder Straps

## Utax takes an active part in various fields.

We gained enough technical knowhow with the production of inner parts & unique materials since UTAX was established. Today, we apply this knowhow to other fields such as Sportswear, medical wears, and lifestyle-goods.

Sport

Medical

Life Goods

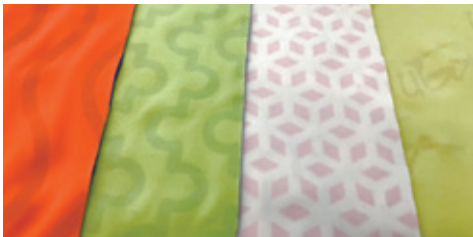

# Special Processing

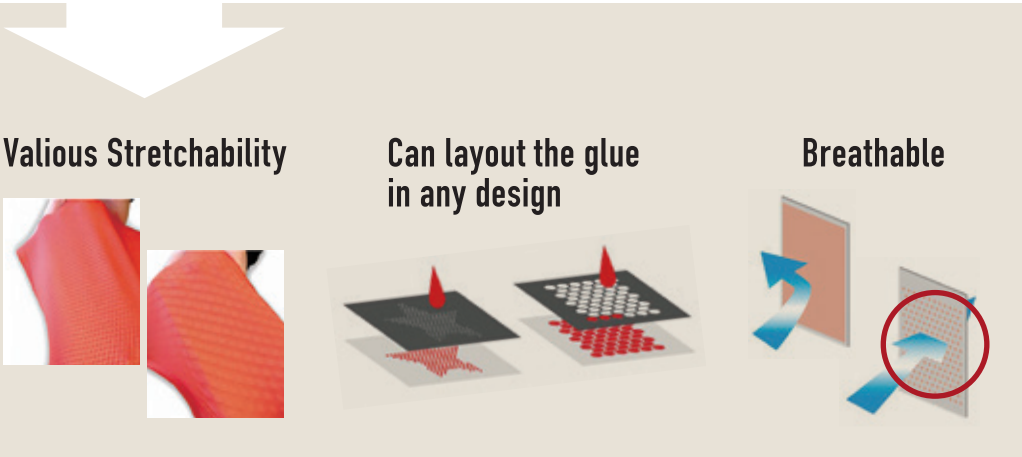

**DPW** DPW is our original dispensing application which directly print the polymer on the fabric. Applicable for various products.

**COMPRESSION BONDING**  
Compression bonding is our special bonding technology which allows unlimited stretchability and breathability by liquid. The level of compression is controllable by the application of the liquid density.

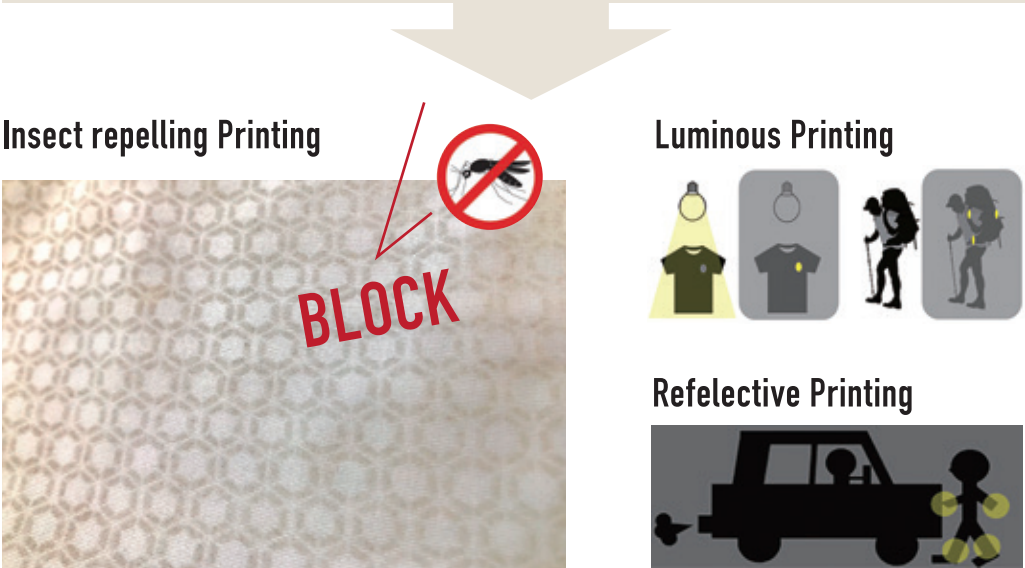

**HOOK & LOOP FABRIC**  
The surface of the fabric is more smoother than conventional magic tape, and it will never hurt your skin or belongings. Just apply our hook & loop fabric to the lining of the pocket (jackets/pants/bag etc..).

**FUNCTIONAL MESH SHEET**  
We have 3 different types of specila mesh sheets they provide good stretch & recovery & shock absorbing feature. It can be applied / sandwitched with the fabric as a middle layer.

**SPECIAL RESIN PRINTING**  
We have fancy and functional resin printing technology such as UV react, Insect reppeling, Luminou and Reflective.

## History

### 1956-1980s.

1956, OCT IZUMI HOKO CO.,LTD. Founded

1967, APR HOJOSENI CO.,LTD. Established  
Inaugurated as an accesory Manufacture

1968, MAR Started production of HOOK & EYE TAPE, Developed Snap tape

1975, SEP Started production of Seamless cup

1976, MAR Developed the machine for producing sholder starap

1977, JUN Started production of Wire and Adjuster

1978, APR Branch office opened in Tokyo  
Started production of Crotch Tape

1979, SEP Started production of Front Hook and Film bone

1980, OCT Trading division established

1985, J U L Extended a building of head office  
OCT HOJOSENI CO.,LTD. renamed to UTAX CO.,LTD.

1986, J U L Started production of shape memory wire

1989, APR Started an operation in Nishiwaki factory  
DEC New dyeing factory completed

### 1990s.

1992, MAY UTAX HONG KONG CO.,LTD. established  
OCT Started an operation in Hong Kong factory

1993, MAR Taiwan office opened  
J U L Held the exhibition of “Advance Talk’93”

1994, OCT Bangkok office opened

1995, JUN France office opened

1997, APR TAIWAN UTAX.CO.,LTD. established  
J U L UTAX F.M.CO.,LTD. established

1998, AUG Started an operation in F.M. factory (Chiangmai/Thailand)

### 2000s.

2000, FEB Held the exhibition of “JIMS”

2003, JAN DALIAN UTAX HIGH-TECH MATERIAL CO.,LTD.  
established (Dalian/CHINA)  
APR UTAX ZONGSHAN FASHION MATERIAL CO.,LTD.  
established (Zongshan/CHINA)  
AUG Developed Seamless production technology  
SEP PT. UTAX INDONESIA established  
DEC Kasai factory merged into Nishiwaki factory

2004, SEP UTAX U.S.A.INC. established

2007, AUG 2nd factory in Chiangmai/Thailand completed  
SEP Head office moved to Nishiwaki city  
Relocated Indonesia Factory

2010, MAY Started Seamless shorts production

2011, AUG Shanghai office opened

2013, AUG Started Seamless bra production

2014, AUG Extended a building of 2nd factory in Chiangmai/Thailand  
OCT UTAX SHANGHAI CO.,LTD. established (Shanghai/CHINA)

2016, AUG New Nishiwaki Factory completed
